Date of Birth: 07 Sep 1995 | Marital Status: Single

PROFESSIONAL SUMMARY

IT professional with 5+ years of experience across IT support, Windows systems administration, and network infrastructure deployment for small and medium-sized businesses. Background spans desktop and server support, Active Directory/Windows Server administration, enterprise wireless and wired networking (Ruijie, Reyee, Ubiquiti), CCTV/access control integration (Dahua, Hikvision), and foundational Google Cloud administration. Known for designing infrastructure that fits the client's actual needs and budget — reusing existing equipment where it makes sense, and recommending new investment only where it adds real value, rather than overselling. Experienced in end-to-end project delivery: client consultation, site survey, solution design, deployment, and support.

CORE SKILLS

Systems Administration: Windows Server, Active Directory, DNS, DHCP, Group Policy, File Server & Permissions, Windows Server Backup, Google Workspace Administration, Synology NAS, Hyper-V (exposure)

Networking & Wireless: TCP/IP, Subnetting, VLAN, Switching, Wireless Site Survey & Heat Mapping, Point-to-Point Wireless, PoE, Captive Portal, Firmware Upgrades, Cloud-Managed Networking, Rogue AP Detection, MAC Binding, Load Balancing, QoS, VPN, Port Forwarding

Cloud: Google Cloud fundamentals — Compute Engine VM deployment, Cloud Storage, IAM role-based access control, basic monitoring

Security & Surveillance: CCTV Deployment (Dahua, Hikvision, IMOU), NVR/DVR Configuration, Access Control Systems, Firewall Rules, Device Hardening, Network Security, Phishing Identification

Platforms & Tools: Ruijie Cloud, Ubiquiti UniFi, pfSense, Linux (Ubuntu/CentOS exposure), Docker (lab exposure), VMware/VirtualBox, Git/GitHub, AnyDesk, TeamViewer, basic Bash/PowerShell scripting

Professional: Technical Presales, Site Survey, Customer Requirements Analysis, Technical Documentation, SOP Creation, Remote Support

PROFESSIONAL EXPERIENCE

IT Administrator

Sep 2022 – Apr 2024

Pyit Taing Htaung CCTV — SMB Infrastructure System Integrator

Myanmar

- Led end-to-end client engagements — consultation, site survey, solution design, and deployment — for network, server, and CCTV infrastructure projects across multiple SMB clients.
- Designed and deployed a multi-hop Ubiquiti point-to-point wireless backbone to deliver reliable internet to a hotel site with no fiber access, avoiding the cost of new fiber installation; extended the same design to two additional properties, including a Wi-Fi 6 upgrade at one site.
- Delivered a combined network and ~100-camera CCTV deployment for a private school campus, covering wired/wireless infrastructure and surveillance from site survey through installation oversight.
- Redesigned a nightclub client's network topology while reusing existing access points to minimize cost, adding a UPS for power stability and reorganizing the equipment rack.
- Deployed CCTV systems across four convenience store branches; integrated a Dahua NVR with IMOU wireless cameras to enable remote, two-way monitoring at one site.
- Administered Windows Server, Active Directory, DNS/DHCP, file servers, and Google Workspace environments for client and internal use; provided remote support via AnyDesk and TeamViewer for field teams.

Presales Engineer

Dec 2020 – Aug 2022

- Conducted requirements analysis and on-site surveys for systems integrator (SI) partners across Southeast Asia, translating client needs into wireless network designs using Ruijie heat-mapping tools.
- Configured switches, gateways, and access points (VLAN, SSID, captive portal, PoE, QoS) to support proposed network solutions.
- Delivered remote technical demonstrations to SI partners over Zoom during COVID-19 travel restrictions, supporting continued project rollout and partner enablement.
- Provided post-installation support, client training, and clear technical documentation following project rollout.

IT Support**Jun 2019 – Nov 2020***Southern Metal Industry — Manufacturing (Internal IT)**Myanmar*

- Provided desktop and infrastructure support for approximately 30–50 users, managing Windows Server, Active Directory, DNS/DHCP, file servers, and Google Workspace.
- Restored full server operations after a ransomware incident using existing Windows Server Backup procedures, avoiding data loss and any ransom payment.
- Identified and blocked phishing attempts before user credentials were compromised.
- Administered Synology NAS storage and supported pfSense firewall configuration; managed user account provisioning, password resets, and hardware/software deployment.

Supply Chain Specialist (Intern)**May 2018 – May 2019***Huawei Technologies**Myanmar*

- Supported supply chain coordination and cross-team operations, building foundational experience in process documentation and stakeholder coordination.

EDUCATION**Bachelor of Computer Science (B.C.Sc.)****2012 – 2018***University of Computer Studies, Yangon (UCSY)*

- Distinctions in Information Assurance & Security, and Project-Based Supply Chain Management.

CERTIFICATIONS & TRAINING**Google Cloud Cyber Security Certificate** — Google Cloud

2024 – 2025

AWS Solutions Architect Associate (AWS Cloud) — Training — Myanmar Business and Technology College

2020

Professional Certificate in Linux (Red Hat) — India-Myanmar Centre for Enhancement of IT Skills

2020

Microsoft Windows Server 2016 — Myanmar Business and Technology College

2019
